

## How can I find the state, county, tract number, block group number and other geographic information of a particular address?

Data.census.gov does not have an address search feature available. However, you can access geographic information, such as the state, county, tract number, block number, and block group number, about a particular address using the Census Geocoder.

The Geocoder can be accessed at

<https://geocoding.geo.census.gov/geocoder/geographies/address?form>.

### Step 1: Select Address under "FIND GEOGRAPHIES USING..." OPTION.

The screenshot shows the Census Geocoder interface. On the left, there are two main sections: "FIND LOCATIONS USING..." and "FIND GEOGRAPHIES USING...". Under "FIND GEOGRAPHIES USING...", the "Address" option is highlighted with a red box. On the right, the "Find Address Results" section contains several input fields: "Street", "City", "State", "Zip", "Benchmark" (with a dropdown menu set to "Public\_AR\_Current"), and "Vintage" (with a dropdown menu set to "Current\_Current"). A "FIND" button is located at the bottom of this section.

### Step 2: Enter the street address.

The screenshot shows the same Census Geocoder interface as in Step 1, but now the "Street" field is filled with "1600 Pennsylvania Ave NW". The "City" field is filled with "Washington", the "State" field with "DC", and the "Zip" field with "20500". A red box highlights the "Street", "City", "State", and "Zip" fields. The "Benchmark" and "Vintage" dropdown menus remain the same as in Step 1. The "FIND" button is still visible at the bottom.

### Step 3: Hit FIND.
